MESSAGE FROM THE CEO

Greetings,

It gives me immense pleasure to bring in a new periodical on VST Small Farm Mechanisation. This Bulletin gives information on all the happenings in this sector and keeps the team members informed on the "way forward" strategies.

Focus on SFM category is imperative as the trend in agricultural industry is very dynamic today with the Power Tiller sector alone growing by 20% CAGR. There is a vast opportunity for VST in this category and we are already in a very propitious position in the market with the No. 1 power tiller brand in India.

With this vision, we have worked on increasing our range of products in this category over years to storm the market and now is the time for us to aggressively tap the market share with our technologically advanced quality products. I appreciate all the dealers and team members for giving a good start by achieving recognizable numbers in the last financial year and would look forward for a jubilant FY 2022-23.

Regards,

Antony Cherukara

Chief Executive Officer
